

THE WILDHATTER

Team 100 celebrating a great season

Aerial AssistSM

This year's game, "AERIAL ASSISTSM" is played by two competing Alliances of three robots each on a flat 25' x 54' foot field, straddled by a truss suspended just over five feet above the floor. The objective is to score as many balls in goals as possible during a two (2)-minute and 30-second match. The more Alliances score their ball in their goals, and the more they work together to do it, the more points their Alliance receives.

Offseason Competitions

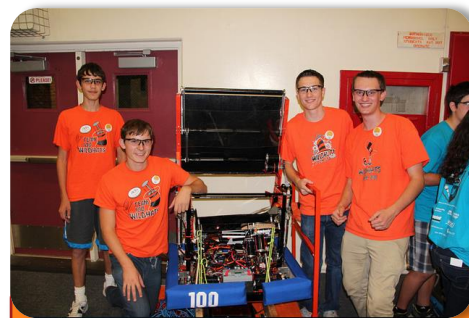

Powerhouse Pwnage: Our first offseason competition took place September 13th and 14th at Pleasant Grove High School in Elk Grove, after a huge summer redesign. We were allied with Team 8973 and 692 and made it to the semifinals. Although we were eliminated, we kept our spirits high and prepared for the next competition.

CalGames: For our second offseason on October 4th and 5th at Fremont High School, the team brought their A-game and soon managed to impress other teams and be chosen by the second-seeded team, 971, and together, chose 4255. We put up a good fight and made it all the way to the finals, but our defeat only drove us on to the next competition.

Madtown Throwdown: Our third offseason competition was at Madera High School on November 9th and 10th. Thanks to a few tweaks after CalGames, at the end of the first day, Team 100 was seeded first. Come time for alliance selection we were 4th, but with our alliance partners, Teams 254 and 1323, we reached semifinals. Elimination was an unfortunate end to our year, but the overall offseason series was a transforming experience for both the team and the robot.

Drive team getting ready

In the Future...

The heat of build season is rising and the Wildhats are as ready as we'll ever be. Strategizing, prototyping, and design are the main focus of Team 100's dedicated engineers after the Multi-team Kickoff event. As of now, Team 100 is registered for two regionals in the spring. Our first regional, the Sacramento Regional, will take place at UC Davis from March 13-15. This will be followed by the Silicon Valley Regional at San Jose State University from April 3-5. We're up for the challenge of the season and can't wait for the new ideas and experiences. Hope to see you there!
